

SWEDISH - AMERICAN ENTREPRENEURIAL DAYS

Swedish-American Entrepreneurial Days

South Sweden August 20 – 23, 2007

Bengt Gerborg
Lars Eriksson

SWEDISH - AMERICAN ENTREPRENEURIAL DAYS

The Entrepreneurial Days Evolution: Impressive

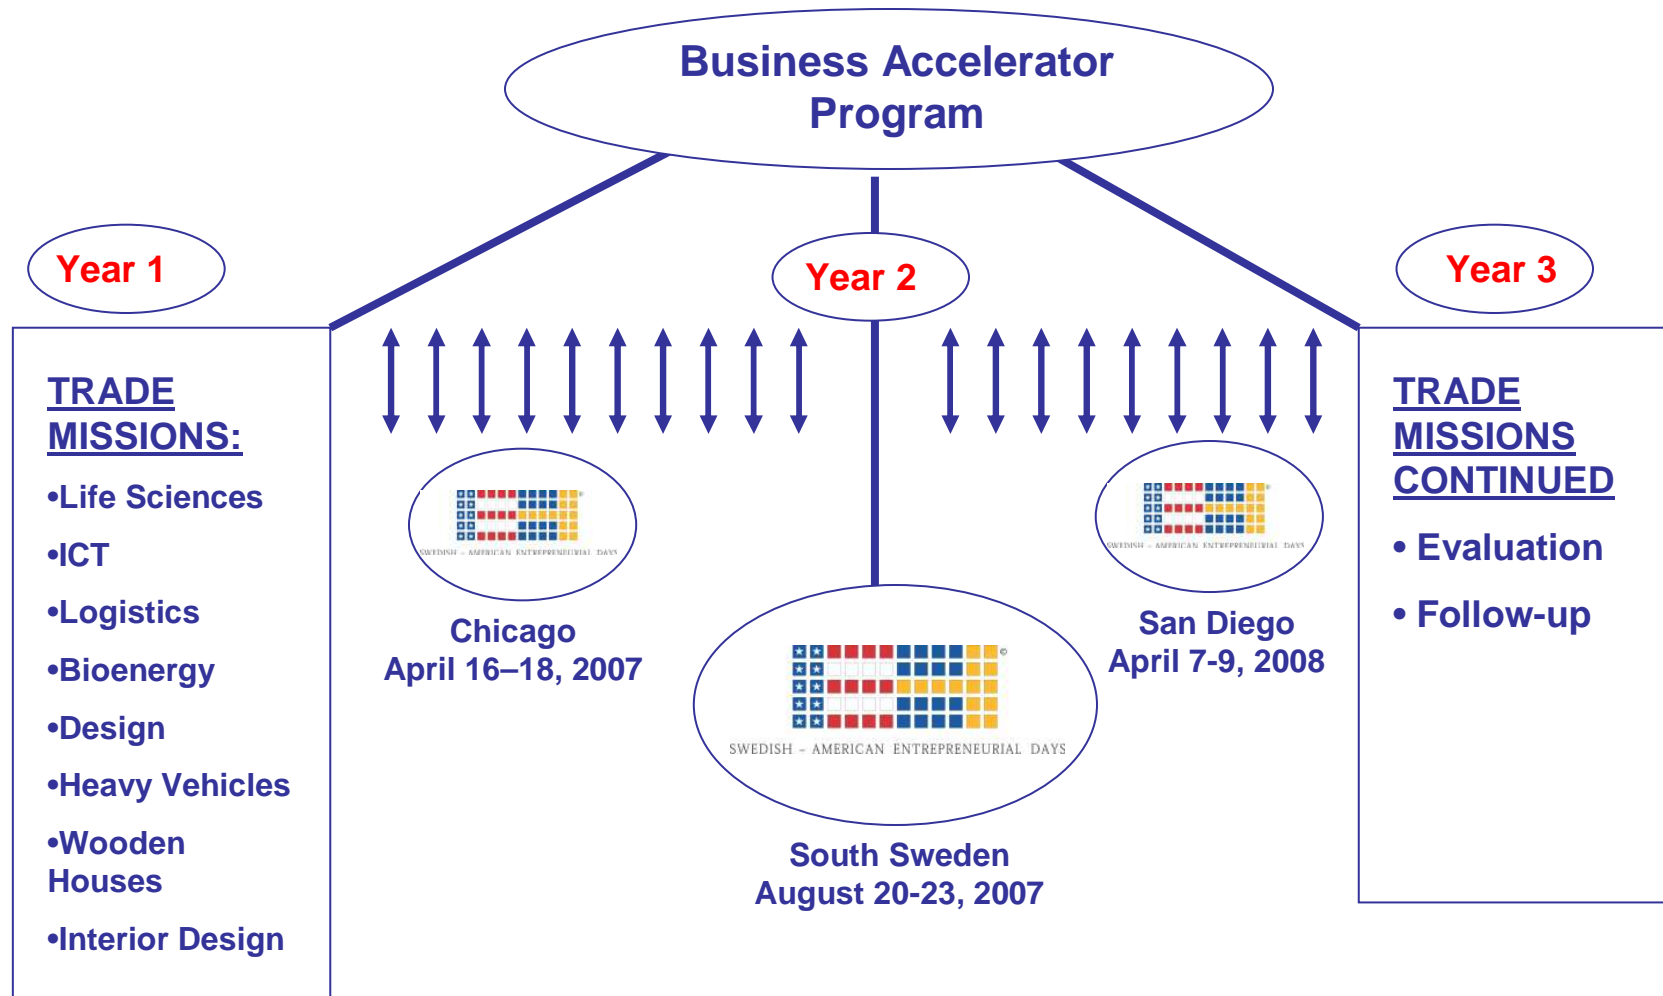

- Then: 1-day event **Now: 3-year Business Accelerator Program**
- Then: 70 Meetings **Now: 1,150 Business Matchmaking Meetings**
- Then: B2B **Now: B2B & Business 2 Venture Capital**
- Then: 100 participants **Now: 950 participants**
- Then: One Host City **Now: Four host cities/regions**
- Then: Edays in Sweden **Now: Edays in Sweden AND in the U.S.**

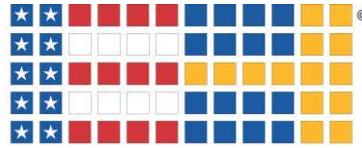

Result:

Successful Regional & Economic Development for Sweden and the U.S.

SACC's Model for Economic/Regional Development:

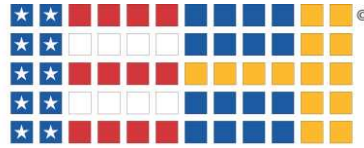

SWEDISH - AMERICAN ENTREPRENEURIAL DAYS

E-Days History

1997	Stockholm	2005	Umeå
1998	Göteborg	2005	Washington, D.C.
1999	Malmö	2006	Lidköping
2000	Stockholm	2007	Chicago, IL
2001	Växjö	2007	South Sweden
2002	Austin, TX	2008	San Diego, CA
2002	Göteborg	2008	Stockholm
2003	Uppsala	2009	Savannah, GA
2004	Växjö		

Since 1997, E-Days has grown to become the most important trade event between Sweden and the U.S.

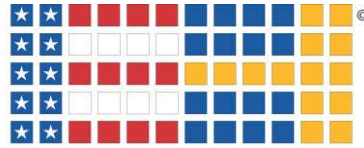

SWEDISH - AMERICAN ENTREPRENEURIAL DAYS

Great Results!!

- **Radius, a Karlkrona-based telecom company**, recently announced their move to Rockford which happened thanks to Edays.
- **BenTech, a Helsingborg-based company**, gained new customers in the U.S. thanks to Lidköping Edays.
- **Hammar Maskin opened an office in California** last summer thanks to contacts made through SACC.
- **SACC chambers in NC, VA and GA** are right now competing for the business of a **Swedish company that's building a factory in the U.S.** employing 50 people. **Flexlink expanded** its business in the U.S. through Lidköping Edays.
- **Several new collaborative agreements** have been established within the bioenergy industry in **Västra Götaland** and **several regions in the U.S.**
- **CIEL** in Lidköping has established a **collaboration with Eigerlabs in Rockford.**
- **Växjö University** is working on a collaborative agreement with the **Northern Michigan University**

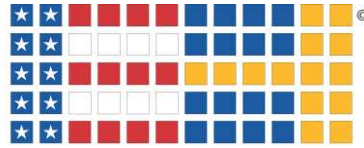

SWEDISH - AMERICAN ENTREPRENEURIAL DAYS

More Great Results!!

- **April Systems in California** is a regular Edays participants, picking up new business every year both in Sweden and the U.S.
- **Lidkoping is working with 7 active leads from the U.S.** to start operations in Sweden.
- **Hammarplast** is proceeding with contacts in Philadelphia that were established at the Golf tournament at last year's Edays.
- Annika Collien's simple, smart invention was connected with an investor in Florida thanks to SACC's business matchmaking program and **received an order of 200 milj units a year from the U.S.**
- **Mardon Medical System from Arizona** have started collaborating with several SACC members both in Sweden and the U.S.

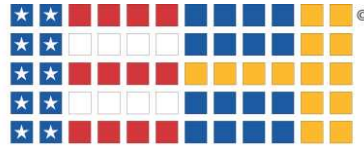

SWEDISH - AMERICAN ENTREPRENEURIAL DAYS

Company: **Comfort Window System AB**
Address: Beryllgatan 33
SE-426 52 Västra Frölunda
Website: www.comfortwindow.com
Contact:
Phone: +46 (0)31-760 80 85
Email: info@comfortwindow.se
Product: Window energy saving system. See website.
Looking for: Importers, distributors in the US.

SWEDISH - AMERICAN ENTREPRENEURIAL DAYS

Comfort Window System (CWS) window fittings are an innovation in windows, heralding the further development of traditional solutions. The window is easy to handle and can be turned so that it either lets through or traps heat.

Two types of glass with different qualities used in the window ensure that heat is regulated according to season.

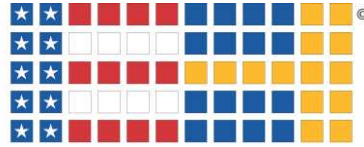

Winter - the heat from exterior solar radiation is extracted and directed into the room

Summer - the flow of heat is blocked from the outside

A window equipped with CWS window fittings can provide the effect of a blind during the summer months and create a radiator effect during cooler months.

Depending on local climate conditions, the window manufacturer can optimize energy saving and comfort by correctly selecting the glass combination.

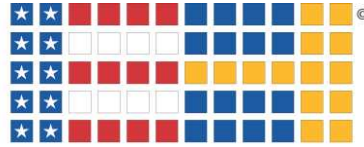

SWEDISH - AMERICAN ENTREPRENEURIAL DAYS

Company: **Improvera AB**
Address: Framtidsvägen 10 A
SE-351 96 Växjö
Website: www.improvera.com
Contact: Charlotte Johansson

Phone: +46 33 20 59 70
Email: andreas.josefsson@oxeon.se
Product: A new breed of high performance carbon fiber reinforcements.
Incubator activity from Chalmers University of Technology.
Product is used in Formula 1, aviation, etc.
Looking for: Importers, distributors in the US.

SWEDISH - AMERICAN ENTREPRENEURIAL DAYS

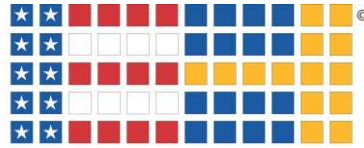

TeXtreme® – How it works

TeXtreme® fabric is based on Oxeon's TapeWeaving technology that uses tapes instead of yarn. In any given area more fibers can be packed in tape form than in a yarn.

A woven material comprising interlacing fibrous tapes, instead of yarns, displays a substantially reduced number of interstices/openings.

This means that a tape woven structure presents less accumulation of matrix at the interstices and hence increased fiber volume fraction.

SWEDISH - AMERICAN ENTREPRENEURIAL DAYS

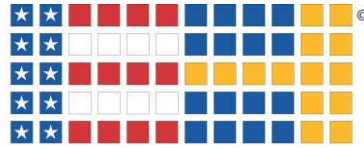

TeXero® carbon UD tapes

TeXero® dry UD tapes deliver low weight with extreme stiffness in one direction. UD reinforcement has become somewhat of a standard item within the industry. With TeXero®, that standard needs to be reviewed.

Many application areas

TeXero® UD tapes are ideal for manufacturers of advanced aerospace, racing, sports, automotive and industrial products - all with extreme demands on material performance.

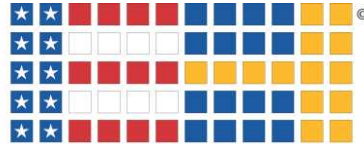

SWEDISH - AMERICAN ENTREPRENEURIAL DAYS

Company: **Popab**
Address: Västermovägen 78
SE-125 40 Älvsjö
Website: <http://www.popab.se/index-en.html>

SWEDISH - AMERICAN ENTREPRENEURIAL DAYS

Company: **Flex 'n Grip**
Address: Skattegårdsvägen 7F
SE-517 36 Bollebygd
Website: www.flexngrip.se
Contact: Lennart Jacobsson, Man. Dir.
Phone: +46 70 587 49 02
Email: lennart.jacobsson@flexngrip.se
Products: Flex 'n Grip is an innovative company creating new solutions using advanced flock technology.
Looking for: Importers, distributors, production in the US.

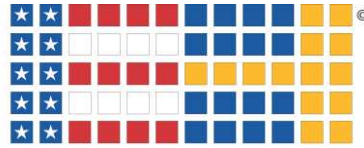

SWEDISH - AMERICAN ENTREPRENEURIAL DAYS

Flex 'n Grip – How it Works

- Flock is a unique method of creating an attractive and smooth surface by applying fibers, approximately 130,000 fibers per square inch. The fibers used in Flex 'n Grip applications are nylon fibers, length and thickness depending on application. The fibers are fixed to the surface with glue.
- Fibers are electrically charged and while applied to its surface high voltage (60 000 volts) is used, which makes the fibers vertical against the surface applied to. The unique asset from material created like this, patented by Flex 'n Grip, is the extremely good friction created when two flocked surfaces are put together and the lack of resistance when separating the surfaces.

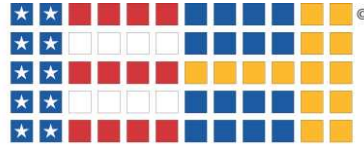

SWEDISH - AMERICAN ENTREPRENEURIAL DAYS

Flex 'n Grip –Sports Grips

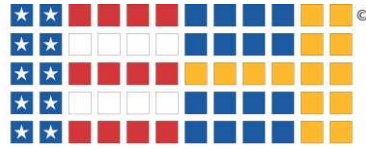

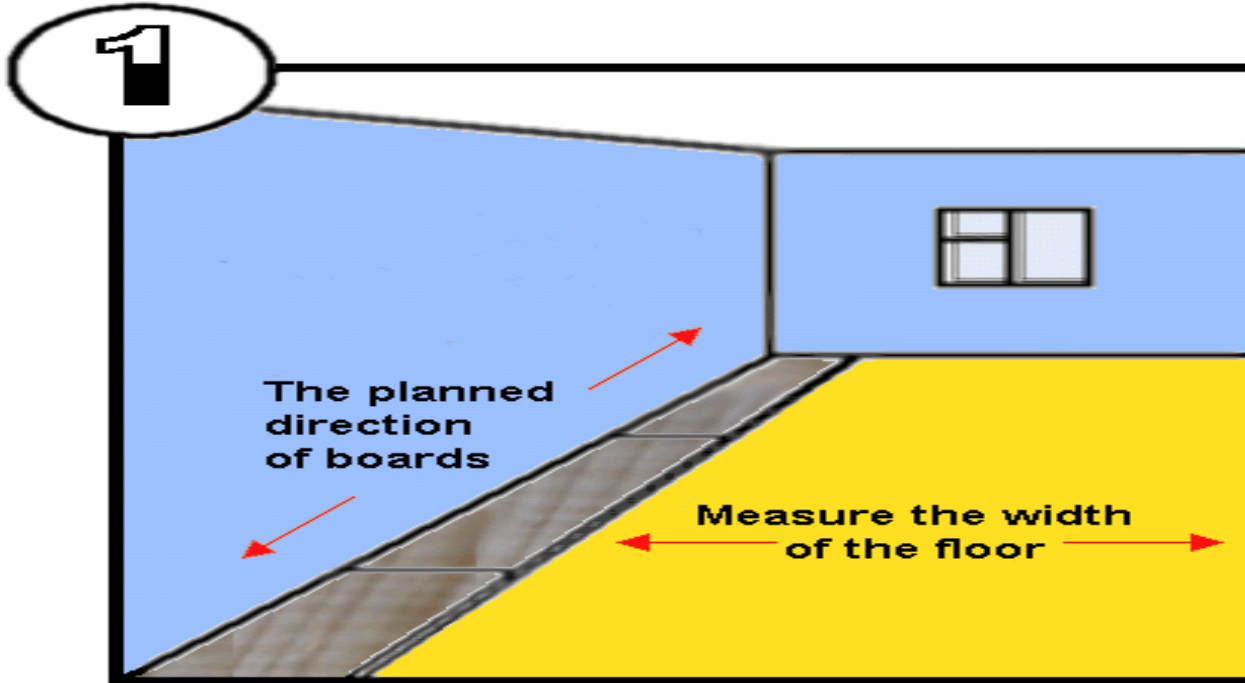

SWEDISH - AMERICAN ENTREPRENEURIAL DAYS

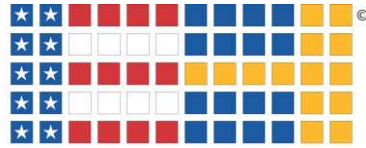

- Company: **Flexfloor AB**
Address: Skattegårdsvägen 7F
SE-517 36 Bollebygd
Website: www.flexfloor.se
Contact: Lennart Jacobsson, Man. Dir.
Phone: +46 70 587 49 02
Email: lennart.jacobsson@flexngrip.se
Products: FLEXFLOOR is a unique, internationally patented way of laying wooden floors. Using this method means:
- No need at all for glue
 - No “click” type of technology needed
 - Sound reduction as “integrated part” of the system
 - Extremely easy to lay the floor in short time
 - Easy to replace damaged tiles
 - Very economical
- Looking for: Importers, distributors, production in the US.
